

## ZelFlex Z4P Self Mounting System

### Technical information

The ZelFlex Z4P self mounting system is a pneumatic four-sided self mounting system for metal stencils. A patented pressurized air system ensures uniform stencil tension over the entire work area. The pressurized air supply can be removed after positioning of the stencil. A permanent pressurized air connection is not required for this system.

### Models

ZelFlex self mounting systems are available in two standard sizes:

Designation	Dimensions and information
23" x 23"	Outside dimension: 584 mm x 584 mm for stencil size 546 mm x 546 mm
29" x 29"	Outside dimension: 736 mm x 736 mm for stencil size 698 mm x 598 mm

ZelFlex Z4P special sizes and adapter kits for numerous machine types, as well as the slim version with reduced installation height are available on request.
